DESCRIPTION

Built in South Australia by Alufarm Marine in Goolwa, this tough plate aluminium boat is designed for our harsh southern waters. In 2010 the boat was repowered with a pair of Suzuki 90hp 4 strokes and the trailer was also replaced with a custom built, full skid, aluminium trailer. The boat comes with a Furuno FCV600L colour sounder, Lowrance HDS10M chart plotter, VHF and 27mhz marine radios and an AM/FM radio. It has a canopy fitted, large bait board with 2 rod holders, gunnel hand rails, large centrally mounted removable esky, Boatcatch and a lockable cabin door. This boat has huge amounts of deck space and suits someone looking for a solid work boat.
